

AnimaliaTours-client

MVP

Mónica

- ☒ 1. Hero (carrusel)
- ☒ 2. hook getRandomactivities
- ☒ 3. cart (cartContext)
- ☒ 4. Login
- ☒ 5. UpdateActivity: updated due to new utils getElementbyId and new route
- ☒ 6. Revisar Añadir Mascota (addPet)
- ☒ 7. Revisar Eliminar Mascota (deletePet)
- ☒ 8. Página Carrito
- ☒ 9. Cart endpoint newReservation (button reservation confirmed and create new reservation).
id=local storage
- ☒ 9. Home Carrusel: Not random. Yes 3 fixed images
- ☒ 10. Cart: GetProfile to be used instead of User Context (decode) to get userId from token
- ☒ 11. Link New Pet with user
- ☒ 12. Cart control: Cart button "Confirmar reserva" only when user is logged in. If not, link to Login.
- ☒ 13. PopUp en Español
- ☒ 14. Activity Format and Navigate to view details

quick questions

- ☒ 1. I have removed the name of the reservations model, but the database still keeps historical information.
- [DISEÑO] 3. The quantity in the cart no longer increases (=1) when clicking multiple times on "add activity," . Decide whether we should remove the control.
- ☒ 4. AddPets -> The view element is not working. Please let me know if I need to check this myself:
<http://localhost:3000/view/pets/66d44fb0d334e697d028ca21> error
- [CAROL] 6. In the profile, I don't see the option to edit pets to view the data and modify it if necessary.

Daniela

1. pagina activities
2. pagina About
3. Register(Con Ale)
4. Contact (Con Ale)
5. En Actividades un botón "Añadir al carrito" -> utilizar context link, añadir el boton modificar linkado updateactivities
6. colores para el cssgris claro: #f0f0f0 , beige suave: #f5e8e8

Aleida

1. Home
2. Footer(Con Daniela)
3. Header(Con Daniela)
4. NavBar(Con Daniela)

Carolina

1. En utils recoger actividad por ID
 2. crear y hacer pagina ver actividad por id
 3. UserProfile
 4. NewActivity (añadir imagen) -> NO usar JSON, usar Form
 5. Dentro del UserProfile -> Bloque de Reservas (usar endpoint getReservationsbyUserId)
- ☐ 6. NewActivity tiene que mostrar la lista de ciudades para elegir en un dropdown en vez de tener que meter el ID a mano.

Haritz

- ☒ 1. SearchBar
- ☒ 2. useRedirection
- ☒ 3. Router
- ☒ 4. PrivateRoute
- ☒ 5. Cities (con Carol)
- ☒ 6. deleteElement
- ☒ 7. Button component
- ☒ 8. NewCity
- ☒ 9. UpdateCity
- ☒ 10. Logout
- ☒ 11. ViewElement with Carrito feature
- ☒ 12. List of Activities in ViewCity
- ☒ 13. ViewElement also for pets and Reservations

BUGFIXES AND IMPROVEMENTS

- ☒ 1. Profile crashes the server app if no user logged.
- [DISEÑO] 2. Register should not be a separate option in the Header. It should be an internal link from Login.
- ☒ 3. "Ver Detalle" in ViewVity crashes. We need 2 separate files for clean workaround.
- ☒ 4. AddPet needs to create link between the new created pet and the user making that action.
- [CAROL] 5. deletePet needs to show a confirmation pop-up prior to deletion.
- [IF DISEÑO] 6. Show only Login when no token. Show only Profile when token.
- [IF DISEÑO] 7. Show Logout icon at right end only when user is logged.
- ☒ 8. Cart button "Confirmar reserva" only when user is logged in. If not, link to Login.
- [DISEÑO] 9. Cart icon near to Logout at right end instead of main NavBar?
- [CAROL] 10. User should be able to cancel a Reservation in his profile page. Confirmation pop-up needed.

- [CAROL] 11. User should be able to change his user information (name, email and password) in his profile page. Confirmation pop-up needed.
- ☒ 12. City images are not being deleted when city is deleted.
- ☒ 13. Home responsive
- ☒ 14. New Activity: Error of Name and Description in Mongo Db and Error in number of maximum clients
- ☒ 15. Create and Update Activity Navigate to view details
- ☒ 16. Format Activity Create vs Modify

EXTRAS

- ☐ 1. Buttons for Activity or City creation / modifying / deletion should appear only if user is admin / provider.
- ☐ 2. Admin Dashboard is showed when token role is 'admin'. Here every user is shown and deletion allowed after pop-up confirmation.
- ☐ 3. Admin Dashboard could show every Reservation and change any of them.
- ☐ 4. Pets collection should allow to add image, genre and description.
